An Epitech graduate, I have been designing and evolving web applications for over ten years, in Python, TypeScript and PHP: Django and Angular, and now NestJS and Vue.js too. I enjoy designing an API as much as polishing an interface, and I take real pleasure in modernising existing code: framework migrations, tests, paying down technical debt.

Experience

Lead Full-stack Developer — Yupeek

[2016 → now]

Menway group · Metz · after internships in 2012 and 2014 🇫🇷

- The group's job and recruitment platforms, from the Django back-end to the Angular apps, all the way to deployment
- Products: ReservoirJobs job board (Angular SSR), multi-campus edition for apprenticeship schools, Elasticsearch resume database, Recrut, internal REST API, WordPress plugin
- Modernisation: AngularJS → Angular, then 15 → 20 (signals, SSR) · Django 2 → 4 · jQuery → ES6 and Webpack
- Internal ERP (PHP 8.3, ExtJS): unit tests and legacy code refactoring · front-end performance
- DevOps & AI: multi-stage Docker images, GitLab CI, Celery, AI-assisted development (Claude Code)

`python` `django` `drf` `nestjs` `angular` `vue.js` `typescript` `php` `postgresql` `elasticsearch` `docker`

Front-end Developer — Etix Everywhere

[2015 → 2016]

Internship · Luxembourg 🇱🇺

- Front-end of a centralised technical management tool for data centres, my first AngularJS project

`angularjs` `es6` `docker` `gulp`

Education

Epitech

[2011 → 2016]

Information Technology Expert · Nancy, Paris 🇫🇷

- Five-year computer science school built around projects, with an internship every year

Keimyung University

[2014 → 2015]

Year abroad · Daegu, South Korea 🇰🇷

- Start of the final-year project, with a team spread across several countries

GOBELINS — UX Design course

[2019]

72 hours · UX methodology, ergonomics, prototyping · Paris 🇫🇷
